SEALCUFF®

IDEAL FOR WET CONDITIONS

BOTH OF THESE ARE IDEAL FOR WET CONDITIONS...

SEAL

SEALCUFF

...ONLY ONE IS AVAILABLE ON PRESCRIPTION.

Protect wounds, dressings, PICC lines, bandages, casts and hosiery with **SealCuff® - Complete waterproof protection**, reusable and latex-free.

Exclusively available from

Daylong
DIRECT.

SEALCUFF®

IDEAL FOR WET CONDITIONS

Whether you are managing a patient with a venous leg ulcer, chronic oedema, cancer undergoing intravenous therapy via PICC line, or a child with a broken limb in a plaster cast. SealCuff® is your go-to solution for waterproof protection.

Available on FP10 prescription, it ensures safe showering without compromising dressings, bandages, or treatment sites.

Ideal for Use With:

Wounds & Leg Ulcers – Safeguard advanced dressings during healing

Compression Bandages – Support oedema and lymphoedema patients with bulky wraps

Plaster Casts – Keep casts dry, prevent odour and skin breakdown

PICC Lines & IV Sites – Protect insertion areas from water ingress

Compression Hosiery – Maintain garment integrity between changes

Clinician Benefits

Maintain Clinical Outcomes

- **Reduces risk of avoidable infection** by keeping wounds and invasive sites dry
- **Minimises dressing changes**, conserving time and resources

Enhance Patient Compliance

- Comfortable **neoprene seal** promotes regular hygiene routines, reducing non-compliance and associated complications
- **Latex-free and skin-friendly**, suitable for sensitive skin or long-term use

Deliver Cost-Efficient Care

- Up to **22-40%* cost savings** vs. the leading alternative
- Durable and **reusable**, lowering long-term costs per patient

*Average price comparison calculated from April 2025 Drug Tariff published prices.

SEALCUFF®

IDEAL FOR WET CONDITIONS

- Waterproof protection for dressings, PICC lines, casts, hosiery, and wraps.
- Reusable, latex-free, with a gentle yet strong neoprene seal for improved patient comfort and compliance.
