

Patient Case History

47 year old Female Patient, attending hospice for support with Lymphoedema in the breast area, following surgery and treatment for breast cancer. The patient is self-caring and has previously not worn a compression bra for her condition.

Product and use

The Patient wore the Solidea Silver Wave compression bra* in which is a medical-grade compression garment designed to alleviate and manage lymphatic circulation disorders, particularly lymphoedema in the breast and armpit area. It has a micro-massaging fabric that reactivates circulation and helps eliminate fluids

The patient wore the bra daily and did light activities for 4 weeks.

Patient and Clinician were asked to provide feedback on the bra after use.

Patient Feedback

(1 = Poor - 5 = Excellent)

How would you rate the overall fit of the garment?	4
What would the patient rate the breathability of the fabric?	5
How well did the product manage moisture during wear? (e.g. sweat absorption):	5
How would you rate the durability of the product? (e.g. quality of materials, resistance to tearing)	5
Did the garment stay in place while in use?	5
What was the patients' level of comfort while wearing the garment?	5
How would they rate the texture and feel of the garment?	5
How easy did the patient find of application?	5
How did the patient find the ease of removal?	5
How would you rate your mobility while using the garment?	5

Clinician Feedback

(1 = I strongly disagree - 10 = I agree)

The compression level of the garment was sufficient for the condition.	8
The garment was easy to apply	8
The garment was easy to remove	8
The garment was beneficial/effective for my patient	8
The patient was able to self-care with this garment	9
I would use the product again	10
I was satisfied with the product	10
There was an improvement in the patients condition	10
There was an improvement in the patient's quality of life	9
There was an improvement in the patients compliance	10
There was an improvement in the patients skin (if applicable)	10

Overall how satisfied are you with the garment:

☐ Very dissatisfied ☐ Dissatisfied ☐ Neutral ☒ Satisfied ☐ Very satisfied

Other Outcomes:

- No pain
- The patient noticed an improvement in their condition and commented that that the bra helped drain the fluid.

Patient comments:

'Comfortable, breathable and the fabric really helped. Noticed the MLD is good with it on'

SOLIDEA®
**SILVER
WAVE**

Summary:

The Patient and the clinician were satisfied with the product, and the patient would be happy to use this product again for light activities, as they felt it would be supportive enough for this type of use. They felt the Silver Wave bra was complimentary to their MLD and help move the lymph fluid.

Patient Case History

59 year old Female Patient, attending clinic for support with Lymphoedema in the breast area, following surgery and treatment for breast cancer. The patient is self-caring and has previously not worn a compression bra for her condition.

Product and use

The Patient wore the Solidea Silver Wave compression bra* in a large. The garment is medical-grade compression garment designed to alleviate and manage lymphatic circulation disorders, particularly lymphoedema in the breast and armpit area. It has a micro-massaging fabric that supports circulation and helps eliminate fluids

The patient wore the bra almost daily and did light activities for 2 weeks.

Patient and Clinician were asked to provide feedback on the bra after use.

Overall how satisfied are you with the garment:

☐ Very dissatisfied ☐ Dissatisfied ☐ Neutral ☐ Satisfied ☒ Very satisfied

Pain:

Please rate the pain at the start of the evaluation

Please rate the pain at the end of the evaluation

Other Outcomes:

- The patient noticed an improvement in their breast tissue and stated that the swelling had reduced and the tissue had softened while wearing the bra.
- They also noticed an improvement in their mobility and range of motion.

SOLIDEA®
SILVER WAVE

Summary:

The Patient and the clinician were both very satisfied with the product, and the patient would be happy to use this product again as they felt it changed their shape and improved their range of motion. The clinician agreed there was an improvement in their condition and that it was beneficial for their treatment.
